

CCC DISPARITIES

CULTURAL COMPETENCE SELF ASSESSMENT

- Need for information about Asian American, GLBT, and African American communities
- Aware of policies within organization that address cultural competency
- Continue trainings and workshops for the CCC Coalition members
- Styles of communication centered around need for bilingual information and literacy level
- Issues of death and dying, end of life, and spirituality across the board there was little knowledge.
- Opportunity for education about complementary and alternative therapy
- Elements of cultural competence working in their organization was open ended question
- Coalition can educate and train on where to go for information and resources and how to incorporate cultural competence and disparities knowledge into day to day working activities.
- Will continue to assess cultural competence in future years
- Did not collect demographic information
- In future assessments include demographic information and information about the role of the respondent, including geographic identification (zip code)
